

FOSN IMP Questions

- 1 Define Social Network?
- 2 What is “Random Walk”?
- 3 Describe Paths & Connectivity?
- 4 What is tie strength?
- 5 Describe Web Search technique.
- 6 Define Hypertext?
- 7 Explain the popularity as a Network Phenomenon.
- 8 Describe the effects of a search tool?
- 9 Explain about Six Degree separation?
- 10 Give examples of direct observations?
- 11 What is Graph?
- 12 Describe Triadic Clouser.
- 13 What is the World wide web?
- 14 Describe Link Analysis.
- 15 What is Power Law?
- 16 Describe the unpredictability of Rich get Richer effect?
- 17 Describe Core Periphery Structure.

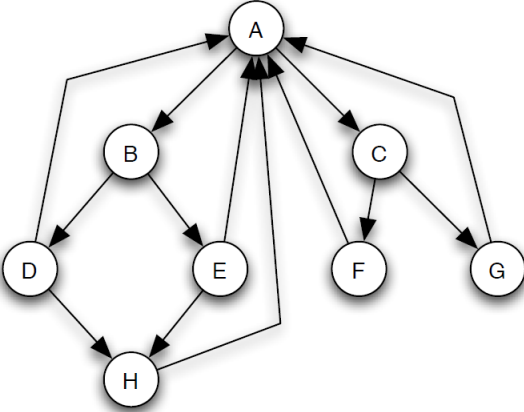

Unit-1

1. Describe The Empirical Study of Social Network?
2. Explain Snow ball sampling in detail with example?
3. Explain in detail about “The Small World Experiment”
4. What is Contact Tracing, explain?
5. Explain in detail about “The Small World Experiment”
6. What is the impact of Interviews & Questionnaires in Social Network?
7. What is the impact of Interviews & Questionnaires in Social Network?
8. Explain Snow ball sampling in detail with example?

Unit-2

1. Describe the importance of Graphs in Social Networks
2. Explain Passive engagement in detail?
3. Describe strong ties and weak ties with example?
4. Explain Passive engagement in detail?
5. Differentiate between Strong ties and weak ties.
6. Describe Graph theory in social network with neat diagram.

Unit-3

1. Describe the History of World Wide Web and its importance.
2. Explain The Web as a Directed graph?
3. Compute the Page Rank for each web page for the first two updates in the figure given below, also define Page Rank Algorithm.

4. Explain the “Bow Tie Structure” of the Web with neat diagram.

Unit-4

5. Explain the power Laws distribution in detail.
6. Describe Rich get Richer Model and its Analysis in detail.
7. What is “The Long Tail”? explain with neat graph
8. Analyze the Rich get Richer Process?

Unit-5

1. Explain the Analysis of decentralized search?
2. Describe about Empirical Analysis and Generalized Models?
3. Describe about Empirical Analysis and Generalized Models?
4. Explain about Structure and randomness in detail?
5. Discuss about Decentralized Search?
